Chapter 3: POI Events..... 4

## Chapter 1: Demo Scene

The demo scene shows demonstrates saving the status of Points of Interest (POIs).

## Chapter 2: How to Save POIs

To save the status of a POI, add a **POI Saver** component. This component saves the POI's visibility, canBeVisited, and isVisited states.

## Chapter 3: POI Events

To connect activity to POI events such as OnPOIVisited, OnPOIVisible, or OnPOIHide, add a **Compass Pro Event** component. You can hook up UnityEvents in the Inspector and/or set Pixel Crushers Message System messages.
